

LINEAR STEEL BENCH

THOMAS BENTZEN ON THE DESIGN “The Linear Steel Series was designed from the idea of presenting durable materials in a sophisticated and understated expression for outdoor use with its form language inspired by the notion of meetings—the meetings of lines, the meetings of shapes and the meetings of materials. The design is defined by its straight lines for a contemporary yet timeless aesthetic through the details of its folded edges, half-circular intersecting legs and small spacing for easy outflow of water. It is through these subtle elements that the Linear Steel Series translates the values of elegance, longevity and functionality into modern outdoor furniture.”

DESCRIPTION

The Linear Steel Series brings new perspectives to modern outdoor furniture through its straight lines alongside the folded edges, half-circular intersecting legs and small spacing for easy removal of water. Kept visually clean for long-lasting aesthetics, the Linear Steel Series finds its distinct character through subtle detailing and a simple expression, allowing for it to complement any outdoor setting. The design is made in powder coated steel for a matte look and contemporary feel.

MATERIAL

Frame and seat are made from steel with a weather-resistant deep matt, UV-resistant powder coated finish. Seat is aluzinc while legs are galvanized treated, making them suitable for outdoor use. Legs come with plastic glides.

CLEANING AND CARE

When cared for properly, the Linear Steel Series is designed to last. Follow these simple rules to care for your design in the best possible way. Clean the bench with a damp cloth after use. If necessary, use a mild detergent or dish-washing liquid, not concentrated. Always wipe with a dry cloth afterwards. To minimize the risk of stains and marks, liquids, grease etc. should be removed straight away. Lacquered surfaces can get scratches and chips if hit by other hard objects. Be careful around the design when handling other hard objects, such as tableware and porcelain. Never stack benches and tables on top of each other as hitting the surfaces against each other will cause lacquer to chip and scratch.

To protect the Linear Steel Series from weather's harm when not in use, a cover can be purchased separately, allowing one to slide the benches under the table.

ACCESSORIES & SPARE PARTS

Linear Steel Bench Seat Pad
Linear Steel Ground Mounting Kit
Linear Steel Screws
Glides for Linear Steel Bench
