

# Linoleum

Linoleum is a natural material known to have anti-bacterial and self-healing properties. Our linoleum surfaces are made with Forbo's furniture linoleum, which is comfortable to touch and has a beautiful matte finish.

**Environmental profile:**

Linoleum is a natural material with low emission. Our supplier, Forbo, uses the Life Cycle Assessment (LCA) to measure their products' complete environmental performance. They collect installation off-cuts and help repurpose end-of-life waste into new products. The products are made in clean, efficient factories, powered by 100% renewable electricity.
