

FIBER SIDE CHAIR – SWIVEL BASE W. CASTORS & GAS LIFT

“One of the most difficult and noble disciplines is to design without eccentricity, creating simple, well-functioning objects that hold strong identities. The Fiber Armchair and Side Chair have a clear sculptural language that refuses to compromise on comfort, stripped of all unnecessary layers. With the element of a gas lift in the design, the iconic form marries soft, embracing curves with an innovative wood fiber composite and added user-friendliness for a chair that is at once modern, functional and tactile.”

DESCRIPTION

Fiber Side Chair is made from an innovative composite of wood and plastic fibers for a deep, matte surface and soft touch. Here, the design combines its slender and embracing form with the functionality of a gas lift for easy raising and lowering of the seating height—an ideal design for any office, co-working space or hospitality interior.

PRODUCTION PROCESS

The wood and plastic composition is heated and poured into a mold that presses the chair's shell. The swivel base is made from die casted aluminum, casted in one piece. Cylinder in aluminum. Pressurized gas lift cylinder.

MATERIAL

Shell consists of a wood and plastic composition with up to 25% wood fibers, 70% PP (polypropylene) and 5% colored PP (polypropyl-

ene). Swivel piece and cylinder in die casted aluminum. Pressurized gas lift cylinder. Black and Grey Swivel Bases come with black castors, White Swivel Base comes with white castors.

CLEANING AND CARE

Clean with a moist cloth. If necessary use a little dish soap on the cloth. For textile upholstery versions, please find cleaning instructions for your chosen textile at kvadrat.com, nevotex.com or for leather at ca-mo.com. For leather upholstery versions: Clean the leather with a dry cloth regularly. Treat the leather at least four times a year using only special leather treatment products.
